

1. Opening Tag and Closing Tag

```
<h1>My Website</h1>
```

The first tag is the opening tag and the tag containing / is the closing tag.

2. self-closing tags

Some HTML elements do not have closing tags.

```
<br>
```

```
<hr>
```

```

```

```
<input type="text">
```

```
<meta charset="UTF-8">
```

```
<link rel="stylesheet" href="style.css">
```

Examples:
 line break, <hr> horizontal rule, image, <input> input field, <meta> metadata, <link>

external resource.

3. Block-Level Elements ?

Block-level elements generally start on a new line and normally occupy the available width.

```
<div>Hello</div>
```

```
<p>Hello</p>
```

```
<h1>Heading</h1>
```

```
<section>Section</section>
```

Common examples: <div>, <p>, <h1>—<h6>, <section>, <article>, <header>, <footer>, <nav>, <main>,

, , , <form>, <table>.

4. Inline Elements?

Inline elements usually remain on the same line and take only the space needed by their content.

```
<span>Hello</span>
```

```
<a href="#">Google</a>
```

```
<strong>Bold</strong>
```

`<em>Italic</em>`

Common examples: `<span>`, `<a>`, `<strong>`, `<em>`, `<b>`, `<i>`, `<u>`, `<small>`, `<label>`, `<img>`, `<input>`.

Easy difference: Block fi new line; Inline fi same line.

5. Semantic Tags ?

Semantic tags clearly describe the purpose or meaning of the content

Tag	Meaning
<code><header></code>	Header
<code><nav></code>	Navigation
<code><main></code>	Main content
<code><section></code>	Section of content
<code><article></code>	Independent content
<code><aside></code>	Side content
<code><footer></code>	Footer

Example:

```
<header> website </header>
```

6. Non-Semantic Tags?

Non-semantic tags do not describe the meaning of their content. The most common general-purpose containers are

```
<div>
```

```
<span>
```

1) `<div>`

```
    <h1>Hello</h1>
```

```
    <p>Welcome</p>
```

```
</div>
```

2) `<p>Hello <span>World</span></p>`

7.formatting tag ?

1)Bold

Bold Text

2)Strong importance

Important Text

3)Italic

<i>Italic Text</i>

4)Emphasis

Emphasized Text

5)Underline

<u>Underlined Text</u>

6)Small text

<small>Small Text</small>

7)Highlight

<mark>Highlighted Text</mark>

8)Deleted

Deleted Text

9)Superscript

X²

10)Subscript

H₂O

8.interactive tag?

Interactive elements allow the user to interact with the page

1)<a> – Link

Google

2)<button> – Button

<button>Click Me</button>

3)<details> – Open/close content

<details>

<summary>Click Here</summary>

<p>This is hidden content.</p>

</details>

4)<select> – Dropdown

<select>

<option>Chennai</option>

<option>Madurai</option>

<option>Thoothukudi</option>

</select>

5)<input>

<input type="text">

9. Parent and Child Elements?

HTML elements can have a parent-child relationship, similar to a tree structure.

Example:

<div>

<h1>Hello</h1>

<p>Welcome</p>

</div>

Children

<h1> and <p> → **Children**

So:

<div> ← Parent

<h1> ← Child

<p> ← Child

</div>
